

## Pipe Ribbon Burner - Schedule 80

### Description

Flynn Pipe Burners are widely used for baking breads, cookies, crackers, snacks etc...

These burners provide exceptional flame retention and uniformity at both low and high fire.

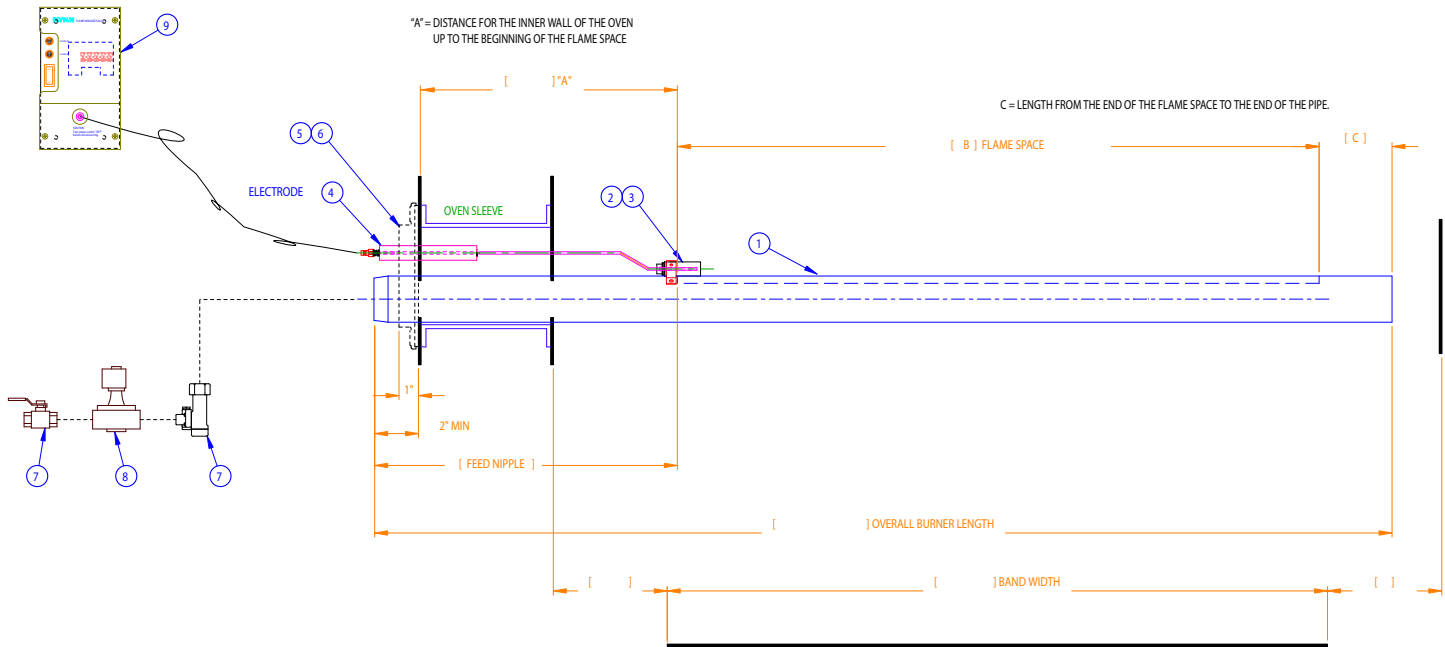

Pipe burners can be manufactured in any length and in diameters of 1" - 3". The ribbons are constructed of stainless steel and can be configured in many different patterns to achieve the desired capacity.

- NOTES: 1. THESE ARE CAPACITY ESTIMATES FOR UNIFORM GEOMETRY ACROSS THE BURNER LENGTHS.  
 2. FOR DISTRIBUTOR BURNERS USE 2" CAPACITIES.  
 2. IMPORTANT: AS THE PIPE LENGTH INCREASES, THE BURNER CAPACITY DECREASES PER UNIT LENGTH.  
 3. FOR PROPANE GAS, REDUCE THE CAPACITIES 15%.  
 4. FOR BUTANE GAS, REDUCE THE CAPACITIES BY 20%.
