

Wafer Oven Burner

The Extruded wafer burner is manufactured in 24" flanged sections. The sections can be bolted together to attain any length burner for a particular oven. Any ribbon pattern can be used to assure the best results in heating the plates.

ZigZag Burner

The ZigZag burner was designed for small Tortilla ovens where heating of a solid steel band in a continuous manner is crucial. These are used in ovens that produce approximately 50 to 100 Tortillas per minute.

Infrared burner

Made to order, the UNIGLO™ radiant burner can be used in many applications where infra red heating is required. It is ideal for baking & tortilla, ovens, toasting, browning, caramelizing, drying, curing and thermoforming.

Three zone pipe burner

Three Zone Distributor Burners

These burners are divided in sections and are designed to allow different flame patterns across the baking band. One settings knob allows for quick, accurate and simple adjustment. No tools are needed.
